

## Active antenna detector with load current limit

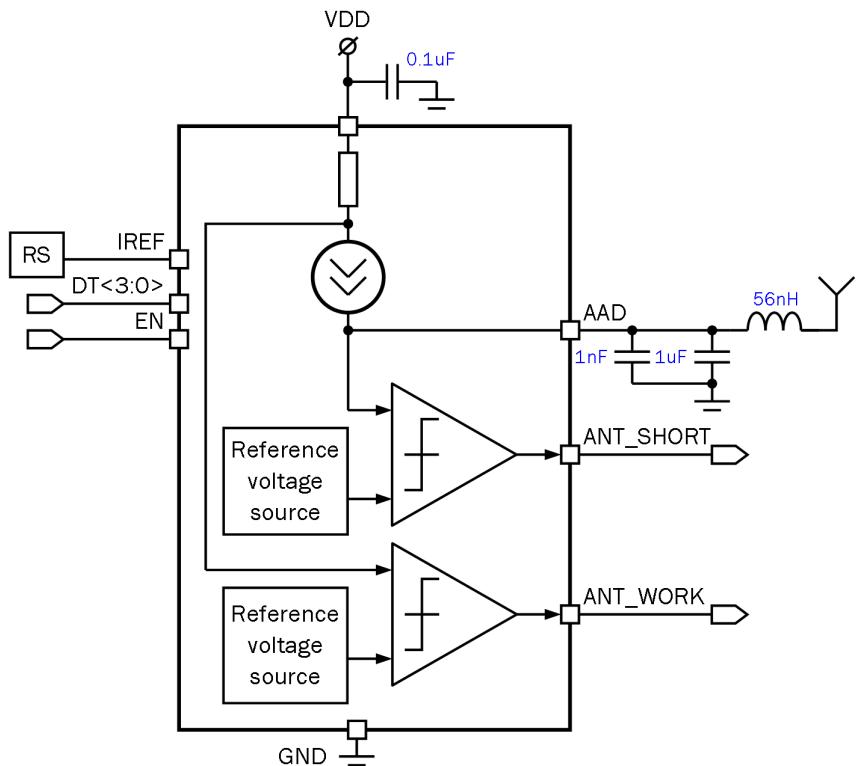

### OVERVIEW

180TSMC\_AAD\_02 is antenna detector which supplies an active antenna and is able to detect both open and short circuits and normal operation. A current limiter restricts the antenna current to a safe level in case of a short detection in order to protect an antenna. **ANT\_SHORT** flag turns to logic one in case of short detection and **ANT\_WORK** flag turns to logic one in case of supplied current is within programmed threshold.

IP technology: TSMC SiGe BiCMOS 180nm.

IP status: silicon proven.

Area: 0.124mm<sup>2</sup>.
